Re: State Permit No. RF 6758

Dear Mr. Fujii,

Enclosed is City warrant #5368 for the permit application fee and information that addresses the City's application for construction of a boat ramp and RV and day use park. The plan includes construction of a boat ramp and relocation of a stream. The stream originally crossed this property. Some 15 to 20 years ago the park area was leveled and the stream was relocated to the west boundary of the parcel. At that time there was a plan to rehabilitate the park. (It had been abandoned in the '50s). Evidently the plan was to make the entire park table flat. After the parcel was leveled no further work has been done.

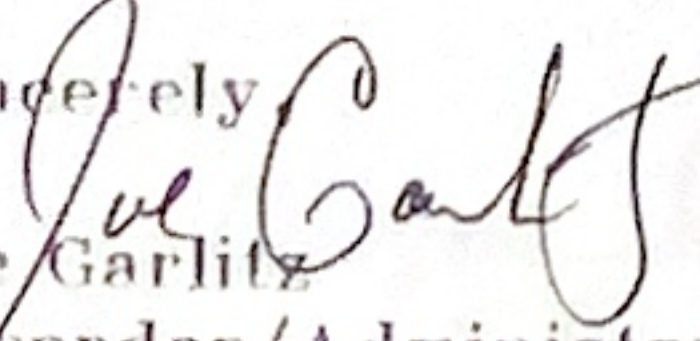

The current plan for the park is to re-landscape the area, building in some surface relief, and to re-locate the stream more-or-less to its original course. The material removed to form the stream bed will be used in the overall landscaping of the park. The objective in moving the stream is to include it as a part of the overall landscape design. At this time there is no specific cross section for the design of the stream. This would become available as the park design is being finalized. Initially we had anticipated filling the old stream (ditch). There is no need to fill the abandoned ditch however and after conversation with Roy Loghry it seem that it is best to leave the old stream bed as is.

A copy of the site plan of the park is enclosed. This shows the concept for the area, the location of the stream and the location of the boat ramp. Also enclosed is a City map showing the location of the park. The US Forest service, Walla Walla ranger District has provided a copy of the design for a boat ramp constructed at Jubilee Lake, enclosed. The Forest Service engineers state that this design will be typical of the proposed boat ramp in the Grande Ronde River.

The construction of this project depends on the combined resources of the US arrested Service, the Oregon Dept. of Economic Development, the City of Elgin and private and corporate contributions. These resources are not fully committed at this time, thus the construction design and schedule are not yet available. The City is pursuing the necessary permits and reviews to allow an expedited construction as the resources become available.

For further information please contact me, or Cathy Wiese, Walla Walla Ranger District, 1415 West Rose, Walla Walla, Wa. 99362 (509)522-6290.

Sincerely,

Joe Garlitz

Re: State Permit No.: RF 6758
Corps Project No.: 92-443
Grande Ronde River - Boat Ramp

Dear Mr. Garlitz:

We received notification from the U.S. Army Corps of Engineers that your project will require a Corps' individual permit. Based on your application, a State permit will also be required. The Corps' public notice will be sent to appropriate State agencies, local governments, adjacent property owners and other interested persons for review and comment.

A permit application fee of \$375.00 is required for your project to complete your state application. Please remit by October 2, 1992, and reference your remittance to State Permit No. RF 6758.

I have been assigned to coordinate your project. Please call me at 378-3805 if you have any questions.

Sincerely,

Bill Fujii
